PROFILE

Systems Engineer with almost four years building web and mobile software for startups, private companies, government institutions and U.S. clients. I lead the mobile app of **Hospédate Bolivia**, a rental platform with 10,000+ downloads, and I run **SolutionTech**, my own software company. **Flutter** is my specialty, but I can take a project all the way: database, API, web dashboard, mobile app and live server. I work with AI tools such as **Claude Code**; architecture, testing and final review stay with me.

~4 years of software experience	**20+** products and projects	**10,000+** Hospédate app downloads	**400+** properties on Hospédate

EXPERIENCE

Lead Mobile Engineer · BolivianDevs

Mar 2025 – Present

Software company with 6+ years building for the Japanese market. Its own product, Hospédate Bolivia, is an Airbnb-style rental platform. Santa Cruz, on-site.

- **Built the Android and iOS app from its first commit** and remain its top contributor, with 2,200+ commits.
- Delivered the full guest and host experience: map search, listings, bookings, rental contracts, calendar, host income, real-time chat and notifications.
- Built the payments for the local market: bank QR, cards for foreign guests and PIX for Brazilian users.
- **Also develop the website** since July 2026: co-hosting, price simulator, cancellations and booking changes.
- Turn Figma designs into working screens connected to the Django backend, alongside the backend team.
- Worked through **410+ Jira tickets**, merged 480+ pull requests and reviewed 240+, using Notion and Slack.

Tech: Flutter, Dart, Bloc, Firebase, Mapbox, React, Astro, TypeScript, Tailwind CSS, Python/Django APIs, Figma, Jira, Notion, Slack.

Founder & CEO · Lead Software Engineer · SolutionTech

Jan 2024 – Present

My software company: custom systems, mobile apps, hosting and integrations for Bolivian businesses. Santa Cruz, hybrid.

- **Lead every project end to end:** requirements, proposals, architecture, development, deployment, support.
- Built a sales, receivables and multi-warehouse inventory system for an agricultural-inputs importer.
- Built CUMAVI POS: point-of-sale app with Bluetooth printing and an online catalog for multiple stores.
- Built POS systems for a billiards business and an iPhone store, plus e-commerce sites.
- Designing a data platform that receives and publishes satellite data from hydrometeorological stations.
- Run deployments myself: Docker, Nginx, HTTPS, Linux servers and automated releases with GitHub Actions.

Tech: Flutter, Next.js, React, Laravel, PHP, NestJS, PostgreSQL, Docker, Nginx, GitHub Actions, Claude Code.

Full-Stack Developer · Systems Consultant · Directorate of Education of Santa Cruz

May 2024 – Apr 2025

Public institution. I digitized its administrative processes with two internal systems. Hybrid.

- **Complaints platform:** forms with attachments, staff assignment, PDF reports and a public news portal.
- **Real-time tracking system:** school districts submit forms while the Directorate monitors responses live.
- Gathered requirements with each department, trained staff and supported the rollout.

Tech: Laravel, Livewire, Tailwind CSS, Node.js, Socket.IO.

Software Developer, Reporting Systems · DUALBIZ S.R.L.

Feb 2024 – May 2024

- Built reports for Teletik, a corporate business-intelligence product, with filters and optimized queries.
- Maintained and extended a legacy enterprise system in production.

Tech: C#, Delphi, SQL Server.

EXPERIENCE, CONTINUED

Mobile Developer · SS Ventures (U.S.)
Sep 2023 – Jan 2024

- **Shipped a lawyer-client app to the App Store and Google Play** for a U.S. company, working in English.
- Added an AI assistant that guides users, real-time chat and appointment scheduling.

Tech: Flutter, Dart, OpenAI API, WebSockets.

Software Engineer · Santa Cruz Departmental Government
Feb 2023 – Sep 2023

- **Built a disaster early-warning system** so citizens receive emergency alerts on their phones.
- Delivered the web platform to issue and manage alerts, the mobile app and mass push notifications.

Tech: Laravel, PHP, Flutter, Firebase Cloud Messaging.

Co-founder · Aprende+
Present

- Tech education brand and community that began as a UAGRM university project. I built its website and create content for TikTok, Instagram, YouTube and Kick.

SELECTED PROJECTS

Hospédate Bolivia — hospedatebolivia.com
Airbnb-style rental platform for Bolivia: 400+ properties, 10,000+ downloads. Mobile app and website.

Disaster early-warning system — GitHub
Alerts, event maps and push notifications for the Santa Cruz Departmental Government. Laravel, Flutter.

Court case prediction system — GitHub
Machine-learning regression that estimates a case's chance of success, plus case management. Laravel.

Sales & inventory management
Sales, receivables and multi-warehouse stock for an agricultural-inputs importer. Next.js, PostgreSQL, Docker.

CUMAVI POS + online catalog — Live demo
Point of sale with Bluetooth printing and 100+ automated tests, plus multi-store online ordering. Flutter, Next.js.

Education management systems — GitHub
Complaints platform and live form tracking for the Santa Cruz Directorate of Education. Laravel, Socket.IO.

Waliki: USDT payments by QR — GitHub
Non-custodial QR checkout for businesses, verified on-chain. ETH Bolivia Buildathon 2026. Solidity, React, Flutter.

Hydrometeorological data platform
In progress. Replaces Sutron XConnect to receive and publish satellite station data. PostgreSQL, TimescaleDB.

Also: CUMAVI Shop fashion marketplace · POS for a billiards business · Inventory and IMEI tracking for an iPhone store · E-commerce in Laravel and Next.js · Algorithmic backtesting engine · SolutionTech and Aprende+ websites.

SKILLS

Mobile	Flutter, Dart, Bloc, Android (Java), iOS, Firebase, Mapbox
Backend	Laravel, PHP, NestJS, Node.js, Express, Python, Django, Java, C#, Delphi, REST APIs, WebSockets
Web	Next.js, React, Astro, TypeScript, JavaScript, Angular, Tailwind CSS, Livewire
Databases	PostgreSQL, TimescaleDB, MySQL, SQL Server
DevOps	Docker, Nginx, Linux servers (VPS), Let's Encrypt, CI/CD, GitHub Actions, Git, Netlify
AI	Claude Code, OpenAI API, LLM integration, prompt engineering
Design & teamwork	Figma, Jira, Notion, Slack
Leadership	Software architecture, requirements analysis, technical pre-sales, project management

EDUCATION

Bachelor's Degree in Systems Engineering
UAGRM (FICCT), 2019 – 2023
Graduated with honors for academic performance.

LANGUAGES

Spanish: Native
English: C1, certified by CAI UAGRM

AVAILABILITY

Open to remote, hybrid or on-site work. Willing to travel and relocate.
